

## 2017 Year End Report

### SPAW Key Philosophies

- Making veterinary care accessible to South Pacific Island communities
- Foster long term and sustainable change to the health and well-being of animals living in island communities by being present
- Work collaboratively with local agencies and governments as a conduit to delivering veterinary care to these communities
- Encourage and promote the benefits of spaying and neutering across all of our programmes
- Promote a respect for and encourage learning about Pacific Islands cultures within our organisation and veterinary aid programme
